

OKLAHOMA STATE UNIVERSITY INSTITUTE OF TECHNOLOGY
POLICY & PROCEDURES LETTER

<p>Network Devices</p>	<p>6-006 INFORMATION TECHNOLOGIES July 2009</p>
-------------------------------	--

POLICY

- 1.01 The Oklahoma State University Institute of Technology data communications network is a mission critical strategic University resource. In order to protect the data communications network, devices other than computers, servers, and workstations must not be plugged into any network port. This includes, but is not limited to hubs, switches, repeaters, routers, network modems, printers, and wireless access points. These devices may be incorrectly configured or incompatible with the Oklahoma State University Institute of Technology network causing outages and reliability problems to all or part of the network.

Computer and Information Services (CIS) strives to provide high availability and stable network resources relevant to the Oklahoma State University Institute of Technology community's needs. Units needing additional network resources should contact the CIS Help Desk.

PROCEDURE

- 2.01 Devices not approved for use on Oklahoma State University Institute of Technology's data communications network will be disabled to ensure the stability and availability of the network.

Approved: June 2005
Revised: July 2009
